### PROFILE

Information Technology student and Back-End Developer Intern who is passionate about problem-solving and exploring new knowledge in computer technology. While I may not always know the answer, I know how to find it and continuously improve my skills. I have hands-on experience developing and maintaining backend systems using Node.js and Supabase, including authentication, role-based access control, session management, and database operations. I am eager to learn, adaptable to challenges, and motivated to apply my skills in creating secure, efficient, and innovative software solutions for the industry.

### INTERNSHIP EXPERIENCE

#### CAELUM FINANCIAL SOLUTIONS / ALLIANZ PNB LIFE

##### BACK-END PROGRAMMING INTERN (OJT )

December 9, 2025 - March 6, 2026 (300 - Hours internship)

- Developed and maintained Login System backend using Node.js and Supabase
- Implemented role-based access control and Admin user management
- Assisted with authentication, authorization, and session security
- Collaborated with the team to complete tasks and meet system requirements

### CAPSTONE PROJECT

#### SMS III: REGISTRAR'S STUDENT INFORMATION SYSTEM WITH ONLINE DOCUMENT REQUEST AND TRACKING MODULE

PHP, JavaScript, Bootstrap, PhpMailer, MySQL

- Developed to reduce long queues, manual paperwork, and delays in registrar document processing.
- Created an online document request and tracking system to provide students with faster and more convenient registrar services.
- Designed to centralize and automate student record management for improved accuracy, transparency, and efficiency.
- Built to modernize registrar operations through a secure and scalable web-based platform.
